

## **Some thoughts of learning English.**

Hi my friends! Getting ahead in your life today is impossible without knowing the foreign languages. English is the most popular one. What should we do to learn English well?

- Having of a personal tutor is the best way to improve English in a short period of time, because he can teach you the way that fits you most.
- Many people think that good progress comes only with frequent and long lasting classes. It's not true. A few hours of studying a week is absolutely enough. Big price should not be a problem here. By the way, online learning by Skype is much cheaper!
- However, learning only with a tutor is not enough for quick results. You should always study on your own as well! Listen to audio material, watch movies in English, read books and improve vocabulary always when you have free time!
- Talking to native speakers is extremely powerful! The internet is your best helper in it! Two times of 40 minutes sessions a week can improve your English very well! The most important thing is your own wish to spend time on learning! This is the key to success!

Take care my friends!
