

## Моя 200-я статья!

Hello my friends! It's been a long time since I wrote my 100th article. Thank to you I kept working on my blog and now I'm about to publish my 200th article! So I'd like to talk a little bit about my project today!

The 100th article was written on 16th of April 2014. It takes me almost eight months to write one more hundred of articles. Not so bad, isn't it? It's about 12 posts a month and 3 post a week. I wish I had more spare time and could write more interesting articles for you! But except for this blog I have other thing to care about in my life. It's of course my job, personal life and Salsa! Yes, I still keep going into Salsa school with my girlfriend! It's absolutely amazing and I like this dance very much!

So 3 articles a week is a pretty good result for me! If you wonder if it's difficult to keep a personal blog on the Internet or not, I can tell you, that it really is. But at the same time it's very interesting! Also any blogger wants to have readers! This is the most important thing for any author. I like that many people find my blog very useful and interesting! I get nice comments and feedbacks from you and I appreciate it so much! Thank you my friends! If I didn't have you I would give up long time ago. So, to some extent, you're creating and improving this blog, not me!

What has changed since April? Speaking of my life, I graduated from University! It was the most bright event this year for me. Speaking of my blog, it's getting improved more and more every day! Now I have more than one thousand subscribers and 500-700 unique visitors per a day! Yandex and Google like my resource and bring me the most number of visitors!

About one month ago I opened my online school! About ten students already learn English with the tutors of my school! It means that designing of it was a good idea and people need it!

So everything goes well with my blog and in my life, guys. That's all I wanted to share with you today! Keep learning English, read my blog, tell your friends and take care!
