

Перевод и употребление «used to»

Hello my deeeear friends! I'm so glad to tell you that I got Master of science on Wednesday. To tell you the truth I can't believe it even now) We finally finished our studies at one of the best Uny of the World! That's really true! I like my University so much! I got acquainted with so many great people there and it was really the time of my life! Everything that we had during these six years was just awesome and there are so many moments that make me smile every time I think about! In one week we're going to get our certificates and after that I'll tell you more about out graduation!

Getting back to learning English, in this short article I'd like to tell you about a very good structure of English. The structure is «used to». It's very useful for the conversation and very simple.

If you want to say that you did something in the past you can say: *I used to do something*. For example:

I used to smoke.

I used to play football.

That's it 😊 Keep learning English my friends, enjoy your life and take care!
