

## Употребление «Anyway» в разговоре

Hi guys! This article is gonna be about one of the most popular word in English. The word is «anyway». Native speakers use it very often in their speech. The reason is this word can be used in many different situations.

The main meanings of the word «anyway» are «так или иначе, тем не менее, как бы то ни было, во всяком случае, всё равно и т.п.» For example:

I'm so lazy, but anyway I'll do this exercise.

(Мне так лень, но, тем не менее, я сделаю это упражнение)

It's very difficult to explain it to you, but anyway I'll try.

(Очень сложно объяснить тебе это, но, так или иначе, я постараюсь)

I'll help you, my friend, anyways!

(Я помогу тебе, дружище, что бы то ни было!)

I've written «anyways». It's not a mistake, just it's possible to say «anyways» if you're using «way» in a plural form. In this case, «anyways» means «in any case». Here is one more example:

My brother's stucking in traffic now, but he'll come anyways = My brother's stucking in traffic now, but he'll come in any case.

(Мой брат сейчас стоит в пробке, но он приедет в любом случае)

I hope it's clear.

One more good and useful translation of the word «anyway» is «по крайней мере»:

Yes, you're right! Anyway, I hope you are.

(Да, ты прав! По крайней мере, я надеюсь на это)

She looks awesome in this dress. Anyway for me.

(Она выглядит замечательно в этом платье. По крайней мере для меня)

So, it's a very good word in spoken English. It's widely used in any English speaking country. Try to use it in your speech and you'll get used to this word anyways;)
